Instrument Practice Log

Name	Instrument

REMEMBER: You should be practicing 3-4 days a week for 20-30 minutes each time.

Practice Tips

 Practice <u>SLOWLY!</u> Play the exercise slowly a few times and then increase the speed as you start to feel more comfortable with it.

IDENTIFY TROUBLE SPOTS. If you keep playing a wrong note or keep having trouble with a
certain part, circle it in your music. Practice just that circled part slowly at least five or six times or
until you get it right.

3) REPETITION. Once you have practiced your trouble spots, play each exercise three to five times.

The more you play it, the easier it will be!

 KEEP A STEADY BEAT. Remember to keep a steady beat by tapping your toe or using a metronome.

Don't always start at the beginning. You can work from the middle or start from the last measure and work backwards.
